

CEWELD SPA 725

TYPE	High-alloyed tubular wire based on a CCrMoNb alloy for thermal spray.
TOEPASSINGEN	Applications that require Corrosion resistance in combination with high temperature and extreme wear.
EIGENSCHAPPEN	High wear resistance with complex carbide structure. The deposit gives a extreme high hardness and is suitable for corrosion protection, homogeneous particle distribution. The spray deposit is only machinable by grinding with diamond tools.
CLASSIFICATIE	
GESCHIKT VOOR	Cement industry, pumps, mixer blades, valves seals, bearings, magnetic sensors, dimensional restoration.
GOEDKEURINGEN	
LASPOSITIES	
MECHANISCHE WAARDEN	
HERDROGEN	Not required
GAS ACC. EN ISO 14175
